

SYNERGY'S SPONSORED TEAM TAKES 9TH IN TOUR DE FRANCE

Synergy WorldWide is tapping into the world of athletics, sharing the performance benefits of our products with professional and recreational competitors alike.

The Swiss registered UCI Professional Continental and Tour de France team, IAM Cycling, finished 9th in the 2016 Tour de France! The IAM Cycling team is composed of 25 accomplished cyclists that are among the best in the world.

IAM Cycling cyclists felt the power of Synergy products from day one. They trust the products and take them before and while training at the gym, training on the road, in competition and especially while recovering. These professional athletes use ProArgi-9+, Mistica, Liquid Chlorophyll, e9 and the Health Shake in their daily nutritional regimen.

“In stage races, ProArgi-9+ helps me maintain normal muscle function, and helps me fight tiredness and fatigue.” said Matthias Brändle, an IAM Cycling professional cyclist and Austrian Champion. *“This is what makes a difference.”*

Synergy products are designed to help people of all ages and lifestyles, including athletes, perform at the highest levels. Synergy looks forward to sharing this message and creating more strategic partnerships with world-renowned athletes in the future.
