Income Path

Our 2+2 in 2 Building Plan is based on members finding 2 Business Partners and 2 Customers within a 2-week period and your 2 Business Partners (and theirs) duplicating the same.

NOTE: These incomes are for illustration purposes and do not represent a guarantee of income.

To reach illustrated incomes, members build a small team of entrepreneurs who build small teams of entrepreneurs who generate income by using and sharing products. Income grows as the network of customers and business partners in the organization grows. It's that simple.

Launching a business requires an initial investment of approximately \$350, with ongoing monthly costs between \$320 and \$380—depending on the products each member selects—and covers products for personal use and/or sharing with others. This monthly order can be changed or canceled at any time. We offer a 120-day, 100% guarantee on all products, so you can try them risk free!
