WEIGHT/WEIGHT LOSS CLINICAL DATA

CULTIVATING GUT MICROBES TO SHAPE HEALTH AND TREAT DISEASE

“A recent study... compared microbes taken from four sets of human twins. In each set, one twin was lean and the other was overweight. The key difference that they found between the pairs of twins was that their bodies held a vastly different microbial balance.

Then, scientists introduced the microbes from each twin into different groups of mice that had been raised in a germ free environment. They found that the overweight microbes from the human resulted in overweight mice, even though both sets of mice were fed identical diets.”
